

Pro Scentnal Brass Spray Nozzle Information:

Nozzle length without Jaco nut and with nozzle closed = approximately 2” long.

Assembly mounts through a 7/16” hole.

Connection is 1/4”compression with supplied Jaco nut.

Orifice Size: .060”

Flow Rates @ 40 PSI Dynamic Water Pressure:

- “Stream” .33 Gallons Per Minute
- “Cone” .20 Gallons Per Minute

Stream is a solid cylinder of liquid with nozzle wide open. Cone is a wide dispersed pattern with Nozzle almost closed.

REMEMBER THAT WHEN USED WITH A PERISTALTIC PUMP, THE OUTPUT IS LIMITED TO THE PUMP OUTPUT IN OUNCES PER MINUTE.

Pro Scentnal Pump Output with water (nozzle not connected) = 18 Ounces per minute
 Pro Scentnal Pump Output with water through spray nozzle full open = 17.75 Ounces per minute (loss of 1.39% of volume through the spray nozzle).
