dispensers

Viking Bowl

Encapsulated
Powder/Solid
Product Dispenser

The Viking Bowl is perfect for high and low-temperature dish machine applications when coupled with a Pro Series dispenser like the Pro III. It will feed encapsulated powder or solid products. When used with a mechanical timer valve, it is a perfect combination for pot and pan sinks, top loader laundry machines, floor care products, and many other screen-feed powder or solid dispensing applications.

Mechanical Timer Unit

Calibrated Dial Controls
Timed Feed to Viking Bowl.
No Electrical Connections or
Batteries Required.

The Viking Bowl Dispensing System

The Viking Bowl is ideal for dispensing screen-feed powder or solid products in a variety of applications. It is great for low and high temperature dish machines. The bowl can be used with a mechanical timer to dispense pot and pan soap, silver soak, floor care, laundry chemicals, and any other screen-fed or solid products that need dispensing on demand.

Top: Screen Caps allows for powdered product to be dispensed with a Viking bowl
From Left to Right:
 The Viking Solid Rinse Bowl and The Viking Superbowl

System	Information & Specifications
Viking Bowl	Holds a 6-inch jug with a standard 100mm neck finish. Comes with complete installation hardware. Optional: Red, Blue, Custom Colors, dish machine mounting hardware, private logo
Mechanical Timer Valve	Controls water flow to a Viking Bowl with an adjustable run time of 10-60 seconds. New internal filter. Mounting Hardware Included.
Screen Cap	For detergent manufacturers: available in two different mesh sizes, available in threaded or locking finish, fits a standard 100mm neck finish or a unique locking neck finish that provides added end user safety and faster filling time. Allows powdered products to be dispensed through a Viking Bowl. Prevents undissolved pieces of solid products from draining out of a Viking Bowl with the dissolved product. Optional: Barrier paper in sleeves of 2500 pieces
Viking Probowl	A manually operated ball-valve style solid chemical dispenser used for filling pot & pan sinks and bus pans. Water not used for dissolving chemical is diverted and mixed with the chemical output below the bowl. cost effective and tamper proof - the set screw used for adjusting chemical concentration is easily adjusted out of view from the end-user. This unit comes fully assembled and ready to install – just add your inlet fitting and water supply and adjust your set-screw.
Viking Superbowl	All in one bowl and microprocessor controlled latching solenoid valve for feeding either powder or solid chemical into a pot and pan sink, bus pan, washing machine, or mop bucket Run time set with a potentiometer, all features toggled on or off with dip switches <ul style="list-style-type: none"> • 2, 5 and 10 minute end user lockouts available. • Mid cycle shut off feature available. • Unit can be manually triggered or signaled by a laundry machine (24-240 volt AC/DC signal) when ordered with Chem\$aver Laundry Trigger Board (CLTB)
Solid Rinse Dispenser	Reservoir mounted under the bowl allows for the use of solid rinse products. Float switch maintains level in reservoir, side-mounted solenoid is wired into an electronic dispenser. 8oz. reservoir volume. Comes with fitting for 1/8" supply tubing and 1/4" supply tubing. AC or DC solenoid valve available.
